ENDURO / DOWNHILL

ADDIX ULTRA SOFT is the ADDIX compound for hardcore use in enduro and downhill. Sensationally good damping has been further improved over the previous VertStar compound, while at the same time ADDIX UltraSoft is suitable for all-weather use due to significantly improved low-temperature properties when it comes to grip and damping.

Extremely soft to cope with very difficult challenges. ADDIX Ultra Soft appears to stick to the ground, literally clawing its way into the subsoil because there's only one goal in sight: maximum damping and maximum grip.

	Rolling prop.	Damping	Grip	Durability
ADDIX ULTRA SOFT	110%	105%	106%	112%

ENDURO / DOWNHILL

ADDIX SOFT is a compound that bridges many disciplines. It's just as at home in the enduro and downhill world as it is in the demanding discipline of all-mountain and trail riding. It also impresses when used in combination with other ADDIX tires – more speed: Soft on the front, Speedgrip on the back. Or more damping: Ultra Soft on the front, Soft on the back.

Rides superbly and provides impressively good damping. That's ADDIX Soft. We've dug deep in the tire builder's bag of tricks to create the perfect balance between the two. The result is a compound that's amazingly good fun and yet is significantly more durable than the previous TrailStar compound. Tip: ADDIX Soft is also ideal for e-MTBs. Here it really plays to its strengths of "great damping and powerful grip", and due to the optimized low-temperature properties it does this all year round!

	Rolling prop.	Damping	Grip	Durability

XC / AM / TRAIL

ADDIX SPEEDGRIP, the universal compound. It definitely has the widest range of use. Perfect for XC, AM and Trail: for the majority of EVO tires there's a version with ADDIX Speedgrip! It replaces the previous PaceStar compound where a significant, though not the only difference, during extensive use is more mileage and a longer life.

Lots of everything: speed, grip and durability. Combining all three characteristics to achieve the perfect compound is almost impossible in theory, but now we've done it with ADDIX Speedgrip to an extent that we never thought possible!

	Rolling prop.	Damping	Grip	Durability
ADDIX SPEEDGRIP	94%	115%	135%	162%

XC Race

ADDIX SPEED is the compound for XC race specialists. It catapults our XC tires into a new performance dimension.

Here's the answer for those who'd like to go even faster. There's only one thing that ADDIX Speed really loves and that's speed. So the rolling resistance has been chopped yet again. It's lower than the previous PaceStar, but at the same time ADDIX Speed is more durable and more resilient.

	Rolling prop.	Damping	Grip	Durability
ADDIX Speed	110%	105%	115%	125%
PaceStar Compound	100%	100%	100%	100%
