

NUKEPROOF
PUSH™

THIS DOCUMENT IS DESIGNED TO HELP YOU GET YOUR PUSH ELEVEN SIX SHOCK SET UP AND READY TO RIDE.

THERE IS A SECTION AT THE BACK WHICH WILL ALLOW YOU TO RECORD SETTINGS AND COMMENTS, TO MAKE IT EASIER TO FIND YOUR PERFECT SETUP.

TRUNNION MOUNT SHOCK

VALVE 1

WITH THE LEVER IN THIS POSITION, THE "SOFTER" SHOCK MODE IS ENGAGED. WE REFER TO THIS AS THE "BUMP MODE".

THIS MODE IS PRIMARILY USED FOR ROUGH TERRAIN WHEN YOU WANT MAXIMUM BUMP PERFORMANCE.

TRUNNION MOUNT SHOCK

VALVE 2

WITH THE LEVER IN THIS POSITION, THE "STIFFER" SHOCK MODE IS ENGAGED. WE REFER TO THIS AS THE "FIRM MODE".

THIS MODE IS PRIMARILY USED FOR SMOOTH TERRAIN, EXTENDED CLIMBING, AND CAN BE SET TO "TRAIL MODE".

PLEASE NOTE

ALL DAMPER SETTINGS ARE SET FROM "FULL CLOSED" (FIRMER) AS A STARTING POSITION. "FULL CLOSED" IS ACHIEVED BY TURNING THE ADJUSTER CLOCKWISE UNTIL IT COMES TO A STOP. THIS WOULD BE CONSIDERED THE ADJUSTERS ZERO POINT. SO IF THE RECOMMENDED POSITION IS "9 OUT FROM FULL CLOSED" YOU WOULD START BY TURNING THE ADJUSTER COMPLETELY CLOCKWISE UNTIL IT STOPS, AND THEN PROCEED TO TURN THE ADJUSTER COUNTER-CLOCKWISE LISTENING/FEELING FOR 9 CLICKS OF ADJUSTMENT.

YOUR ELEVEN SIX SHOCK HAS BEEN DYNO TESTED AND PRESET AT THE FACTORY WITH THE FOLLOWING SETTINGS. WHILE YOUR SHOCK IS READY TO RIDE IN THIS CONFIGURATION, PLEASE REFER TO THE TUNING GUIDE BELOW FOR MORE EXACT INFORMATION.
